Utatuzi wa Kimsingi wa matatizo

Tatizo: Sioni uchanganuzi wa maelezo ya mtoto wangu.

Kuna sababu kadhaa zinazoweza kusababisha hili:

1. Maelezo ya mtoto wako ni sahihi lakini bado hajapiga kadi yake picha.
2. Maelezo yako ya simu/mtoa huduma yanaweza kuwa si sahihi kwenye [tovuti ya ZPass Plus](#).

Tatizo: Uchanganuzi wa maelezo ya mtoto wangu umechelewa na saa kadhaa.

Unahitaji kurekebisha saa ya eneo. Fuata hatua hizi.

1. Ingia kwenye akaunti yako katika [tovuti ya ZPass Plus](#).
2. Bofya kwenye kichupo cha "Mipangilio".
3. Bofya kwenye kichupo cha "Maelezo ya Akaunti na Malipo".
4. Hapa, unaweza kurekebisha saa ya eneo.

Muhtasari wa Mfumo wa ZPass Plus (unaendelea)

Tatizo: Sikupokea msimbo wa uthibitishaji kwenye simu yangu ya mkononi.

Kuna sababu kadhaa zinazoweza kusababisha hili:

1. Misimbo ya uthibitishaji hutoka kwa barua pepe ya "usijibu". Kampuni ya simu yako inaweza kuichuja kama barua taka. Wasiliana na kampuni ya simu yako na uwaombe waongeze zonarsystems.com kwenye Orodha ya anwani Zilizoidhinishwa. Hii ni orodha ya anwani za barua pepe zinazoruhusiwa kupita kwenye vichujio vya barua taka.
2. Mpango wako wa simu ya mkononi lazima ujumuishwe huduma ya SMS. Ikiwa huna uhakika iwapo huduma ya SMS imejumuishwa au haijumuishwa katika mpango wako wa data, wasiliana na mtoa huduma wa kifaa cha mkononi ili uthibitishwe.
3. Pia, hakikisha kwamba umewezesha ujumbe wa SMS katika mipangilio ya kifaa chako. Wakati mwingine, SMS haijawezeshwa kwa chaguo-msingi au inaweza kuzimwa ikiwa umesasisha mfumo wako wa uendeshaji.
4. Hakikisha kwamba uliweka nambari kwenye [tovuti ya ZPass Plus](#).

Tatizo: Anwani iliyoonyeshwa ya uchanganuzi wa maelezo au shule ya mtoto wangu si sahihi.

Kadi ya mwanafunzi inapochanganuliwa, picha hiyo hutwa alama ya latitudo/longitudo ya mahali ilipopigiwa. Kisha maelezo haya hubadilishwa kwa saa za eneo kupitia Ramani za Bing ili kuonyesha anwani ya mtaa ulio karibu zaidi. Wakati mwingine, hasa ikiwa uchanganuzi unafanywa katika eneo kubwa la maegesho, latitudo/longitudo itaonyesha anwani iliyo karibu na eneo la maegesho. Ingawa latitudo/longitudo ni sahihi sana, Bing haina njia ya kujua ni upande gani wa sehemu kubwa unaolingana na anwani ya jengo, kwa hivyo itachagua iliyo karibu zaidi.

Tatizo: Ninajaribu kuweka maelezo ya mtoto wangu na tovuti inasema "Msafiri Hapatikanl."

Maelezo unayoweka ni tofauti na yaliyo kwenye hifadhidata. Angalia ili kuhakikisha kuwa unaweka maelezo ya jina la kwanza, jina la ukoo, na RFID # jinsi yanavyoonyeshwa kwenye kadi.
